*The Fund performance relates to wholesale investors only. If you are a retail investor, you can obtain up to date returns at advance.com.au.

Inception date: 30 June 2004

¹ Benchmark: The benchmark for the Fund is created from a blend of indices based on the Fund's exposure to different asset classes. Details of the particular market indices used for the Fund's benchmark can be found on advance.com.au.

Fund update	
	<p>The Advance High Growth Multi-Blend Fund maintained a slight underweight holding to commodities and property securities relative to the neutral benchmark allocation, whilst maintaining a slight overweight holding to international shares and alternative strategies. The performance of the Advance High Growth Multi-Blend Fund was below that of the benchmark return with manager selection having a negative impact on the overall performance from the Fund's return.</p> <p>Over the quarter, the Advance Australian Shares Multi-Blend Fund slightly underperformed the benchmark, returning 1.8% after wholesale fees, while the S&P/ASX 300 Accumulation Index delivered 2.1%. The small companies' managers outperformed, but were unable to offset the underperformance of the small cap sector relative to their large cap peers. Performance across our larger company managers was mixed as some company shares continued to decline irrespective of quality.</p> <p>The Advance International Shares Multi-Blend Fund was positive but underperformed its benchmark over the quarter. The Fund was up 1.4%, whilst the MSCI World ex Australia Index rose 2.0%. From a manager perspective, outperformance from Trilogy, AQR and MFS was unfortunately more than offset by underperformance by Tradewinds, Lazard and Schroders.</p> <p>The Advance Asian Shares Multi-Blend Fund underperformed its benchmark over the quarter. The Fund declined 4.4%, whilst the MSCI AC Asia ex Australia Index fell 2.1%. Wellington's underperformance was a result of weak stock selection in the consumer discretionary and financials sectors. TT International's disappointing quarter was driven by negative stock selection in the technology and financials sectors which outweighed positive stock selection in materials and industrials.</p> <p>The Advance Property Securities Multi-Blend Fund returned 5.8% for the quarter, underperforming its benchmark, which returned 6.5%. European Investors underperformed the benchmark by returning 6.4% versus the FTSE EPRA NAREIT Developed Index (hedged in AUD) return of 7.2% for the quarter.</p> <p>The Advance Alternative Strategies Multi-Blend Fund generated positive performance of 1.30% for the December quarter with limited volatility while equity, credit and commodity markets continued to have wild swings. Out of the portfolio's four building blocks (Alpha, Replication, Diversifiers and Rule Based Alternative Beta) only the last was marginally down with the remaining allocations generating positive performance.</p> <p>Thanks to the strong rebound in commodity prices in October, the GSCI commodity index advanced by 9.4% during the quarter. Whilst all commodity markets are subject to different forces and investing across a range of them adds diversity to the portfolio, most are being impacted by three forces currently tight supply/ demand, fears over a lower growth economic environment in the future and a strengthening US dollar. The latter two forces are curbing the positive influence of the former on commodity returns.</p>

	Fund %	Benchmark %
Schroders	3.46	2.12
Trilogy	4.68	2.00
AQR	3.87	2.00
Alleron	3.63	2.12
Contango	5.71	-0.60

Market commentary

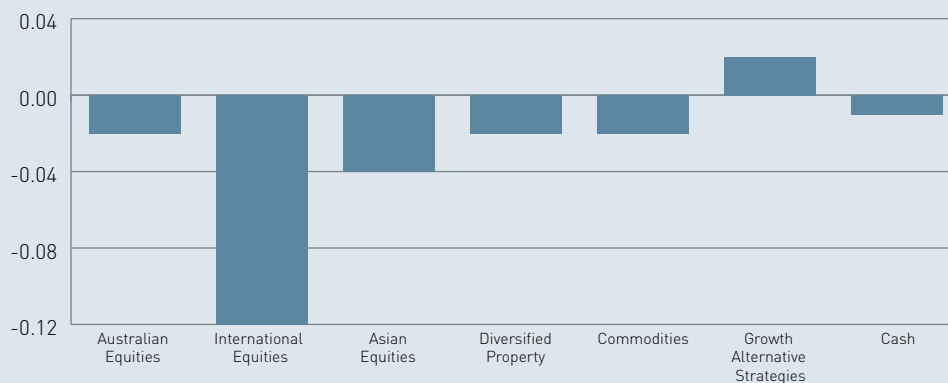

Growth assets posted gains during the December quarter, despite heightened risk aversion and market nervousness. Better than expected economic data releases in the US and in leading European nations supported risk taking by return hungry investors. International and Australian bonds recorded modest gains while most yields remained low. International shares in local currency terms powered ahead whilst the strength of the Australian dollar eroded gains made on an unhedged basis.

International share markets posted strong gains in the December quarter partly offsetting losses made in the September quarter with international equities now having declined 5.0% for the last 12 months in both local currency terms and on a unhedged Australian dollar terms basis. However over the December quarter, international shares in local currency terms recorded gains of 7.9% which on an unhedged Australian dollar term basis, this index gained 2.1%. The 5.8% movement in the Australian dollar contributed to the underperformance of the unhedged Australian dollar international equities index.

The Australian equity market managed to post modest gains despite continued political, economic and sovereign debt issue concerns gripping markets. The S&P/ASX 200 Accumulation Index gained 2.1% over the quarter, slightly underperforming the local currency global equities index whilst performing in line with the unhedged global index.

Australian listed property posted modest gains over the quarter, whilst hedged global listed property posted strong gains. Australian listed property was one of the better favoured sectors on the Australian bourse although investor preference was for defensive sectors within the equity market. Attractive income yield and distribution yield supported global property securities during the quarter. The S&P/ASX 200 A-REIT Property Accumulation index returned 3.7%, whilst the hedged global REIT index returned 7.2% over the quarter.

Benefits of investing in the Fund	Diversified funds are designed for investors seeking a balanced portfolio of investments. The High Growth Multi-Blend Fund invests exclusively in growth assets, therefore has a high risk level. The managers of the Multi-Blend Funds are selected for their own investment style and process. The Multi-Blend approach is based on the belief that the different styles of each manager when combined, can produce a more consistent outcome for investors by minimising style and portfolio risk.		
Investment objective	To provide superior total returns (before fees and taxes) over the long-term through capital growth by investing in growth assets.
